PROFESSIONAL EXPERIENCE

Neander Cyber Solutions

Cyber/IT Consultant

New York, NY, USA

February 2024 - Present

- Enhanced security posture for clients by conducting comprehensive security audits and risk assessments using industry-standard tools and methodologies, ensuring compliance with GDPR and HIPAA regulations.
- Improved service delivery and threat response capabilities by designing and deploying SIEM solutions integrated with existing IT infrastructure, enabling real-time threat detection and incident response.
- Increased system reliability and performance by building custom PCs and optimizing hardware configurations tailored to meet specific client needs, enhancing both performance and reliability.
- Streamlined network security and connectivity by designing and installing network infrastructure, including routers and switches, and implementing robust connectivity and security measures for residential and commercial environments.
- Enhanced technical support and troubleshooting effectiveness by configuring and maintaining network security measures, including firewalls and intrusion detection systems, ensuring secure remote access solutions.

PSEG

Cyber Security Professional

Newark, NJ, USA

June 2022 - December 2023

- Reduced manual effort by 75% and enhanced security by developing automation processes for CVE validation of OT inventory, leveraging UNIX/Linux systems for technical support and compliance.
- Ensured 100% compliance and improved security by implementing PowerShell scripts to automate device logging, contributing to efficient service delivery and effective troubleshooting.
- Improved system reliability and incident response by identifying potential threats and resolving syslog server issues using UNIX/Linux for troubleshooting and technical support.
- Enhanced security awareness and proactive response by conducting MITRE ATT&CK vendor simulations, providing actionable insights, and coordinating with teams to improve service delivery.
- Improved update efficiency and minimized vulnerabilities by compiling and maintaining patch management documentation, ensuring compliance with operating systems standards.

Sewanhaka Central High School

Information Technology Professional

Floral Park, NY, USA

July 2018 - July 2019

- Boosted printer productivity by 30% through technical support and troubleshooting for laser, inkjet, and high-volume printers, enhancing service delivery.
- Ensured seamless functionality for over 500 iPads by managing and maintaining the network, promptly resolving connectivity issues and enhancing service delivery.
- Improved network performance by 20% through the strategic rerouting of network cables across two school buildings, optimizing data flow.
- Reduced data loss risks by 50% by implementing robust backup protocols using cloud-based solutions, ensuring compliance and swift recovery in case of system failures.
- Enhanced cybersecurity and teacher service by implementing effective risk management strategies, aligning with compliance standards.

PROJECTS & OUTSIDE EXPERIENCE

DISC 2023

- Ranked #152 out of 866 teams in Dragos' DISC 2023 CTF event by analyzing firewall rules, memory images, and conducting digital forensics using Wireshark, EnCase, and John the Ripper.
- Enhanced team performance and problem-solving in a global competition requiring technical support and troubleshooting by contributing to a team effort leveraging analytical skills and technical expertise.
- Developed proficiency in operating systems and digital forensics tools through participation in a competitive cybersecurity event, utilizing tools such as Wireshark and EnCase while analyzing complex data sets.
- Strengthened communication skills and service delivery in a collaborative environment during a cybersecurity competition by working effectively within a team to solve complex challenges and document findings.
- Improved compliance and security analysis skills in a CTF event focused on cybersecurity and digital forensics by conducting thorough analysis of regex patterns, passwords, and compliance standards.

Cyber Security Homelab

- Enhanced threat detection and response efficiency by designing and implementing a real-time security monitoring and incident response system for SOC operations using Splunk Enterprise with a custom dashboard, contributing to superior technical support and troubleshooting capabilities.
- Improved network security by configuring and maintaining a network security framework using Palo Alto NGFWs and Fortinet FortiGate for IDS/IPS and OpenVPN for secure remote access, enhancing compliance and service delivery.
- Ensured continuous alignment with security best practices by automating patch management and compliance monitoring using Ansible for configuration management and Nessus for vulnerability assessments, supporting robust operating systems.
- Proactively identified and mitigated emerging threats through advanced analysis and log management using Elastic Stack and integrating custom threat intelligence feeds, reinforcing troubleshooting and Unix/Linux capabilities.
- Established a comprehensive incident response protocol by using Splunk for initial alerts and Elastic Stack for deeper incident analysis and resolution tracking, ensuring efficient service delivery and effective use of ticketing systems.

PUBLICATIONS

Schmelk, S.; Almonte, T.; Carenza, M.; Devil, N.; Dukacz, H.; Kobetitsch, K.; Belo, A.; Ramos, L. F.; Corris, L.; Jamal, M. F. B.; Looby, D.; Dragos, D. (2024). *Privacy and Security of Mobile Banking: A PRISMA-Centric Review of Android Finance Applications*. In *Proceedings of the Future Technologies Conference (FTC) 2024, Volume 2* (Lecture Notes in Networks and Systems, vol. 1155), pp. 11–29. Springer, Cham. https://doi.org/10.1007/978-3-031-73122-8_2

- Conducted a PRISMA-based systematic review of 37 Android mobile banking apps using static and dynamic analysis techniques.
- Identified and categorized 2,157 potential vulnerabilities by risk severity, highlighting weaknesses that could compromise user and institutional security.
- Evaluated privacy policies and uncovered covert data collection practices, demonstrating significant risks to consumer privacy and regulatory compliance.
- Contributed evidence-based recommendations to strengthen mobile banking security, bridging academic research and real-world application in financial cybersecurity.

SKILLS

Skills: Python, Excel/Numbers/Sheets, Java, Linux/Unix, Power BI, PowerShell, Security Policy, OT Security, Automation, Bash, Incident Response, IDS/IPS, SIEM, Syslog, Penetration Testing, Patch Management, Access control

Languages: French, Haitian
